

MAHEEN SABIR

maheenkhan12614@gmail.com

FULL STACK ENGINEER

Full-stack MERN developer with 4 years of experience in the tech industry. Proven ability to build and deploy scalable and reliable web applications. An energetic learner, and passionate about market trends. Able to analyze and quickly grasp technical issues and present viable solutions.

SKILLS

- React.js
 - Next.js
 - Node.js
 - Express.js
 - Nest.js
 - Keycloak
 - AWS Cognito
 - Postgres
 - MongoDB
 - Redis
 - MySQL
 - RxJS
-

EDUCATION

Superior University, Lahore
BS in Computer Science

PROFESSIONAL EXPERIENCE

Your London Chauffeur

October 2022 - Present

Full Stack Developer

YLC is a chauffer service and they provide reliable, luxurious transportation in London. Their uniformed chauffeurs are extensively trained and experienced, and they consistently exhibit a professional, reliable and friendly manner.

- Worked on this project as a full-stack developer and developed a responsive web application using React and Bootstrap to provide luxurious transportation booking.
- I implemented a dynamic booking form with real-time chauffeur tracking functionality
- Created a database-driven back end using Node.js, ensuring efficient data handling and storage.
- Deployed the application to a production environment. Integrated webpack for module bundling and optimized build processes.

Full Stack Developer

Uptok provide Re-humanizing Digital Experiences. They Conduct 1-on-1 video shopping consultations with the most serious shoppers.

- I handled both the front-end and back-end sides. It was challenging for me to integrate the Agora video and confirm approval from the Shopify app.
 - I created a dashboard for shopping with the sales studio and customer review.
 - I've integrated multiple APIs and Added payments methods using React, NodeJS, Typescript, and PostgreSQL.
-

SAMEER BUTT

FULL STACK DEVELOPER

sameerbutt151@gmail.com

About Me

Highly motivated individual with almost 4.5 years of professional work experience in challenging environments. A quick learner who adapts to extraneous assignments and exploring new dimensions while solving development problems. I enjoy being a part of collaborative environments that encourage a proactive mindset.

Experience

Lifescrypt Jan 2023 - Present

FULL STACK ENGINEER (Majorly Backend)

- Lifescrypt helps its users create well-versed and featured auto-biography using AI tools, input questionnaire, voice memos and images. The product will have some free for all features and some premium features
- I handle the backend side and develop the features like User written auto biography from Open Ai (GPT), along with editor functionalities, including, speech to text, Grammar suggestions.
- The Challenging task is to implement the Image enhancements from AI, if they required any image. To provide the easiness, I proposed the solution for creating the Multiple Chapters and their Questions, which user will answer for auto biography, and after enhancements, that biography will be used as a book.
- Technologies: React, Next, Material UI, Nest, GPT 3.5 Turbo - AI services, and AWS

SPPC Jul 2022 - Dec 2022

FULL STACK DEVELOPER

- SPPC is basically a Saudi Pakistan Professional Community. It is similar to linked in handling user connections feature, notification features, chat features, posts features, handling user connections feature, notification features, chat features, posts features, events features, jobs features, company features and many more. It is a platform used for job searching and applying similar to linked in.
- I optimized the frontend for smooth user experiences and I craft an efficient job-search mechanism, enhancing user engagement through dynamic features.
- Technologies: React, Next, Redux, and Nest.

Cluey Oct 2021- Jun 2022

FULL STACK DEVELOPER

- Cluey targets an audience that selects brands based on their values and standards. Cluey keeps details about each brand, including what the brand is, how much and in what manner it participates in political campaigns, what impact it has on the public, and which alternative brands are available.
- I design and implement the client and server side logic using Angular and Node to support a platform catering to an audience driven by brand values.
- I oversee the storage and retrieval of detailed brand information, including political campaign involvement, societal impact, and alternatives.
- I was involved in crafting robust APIs, data flow, and optimizing performance. I contribute to maintain data integrity and uphold privacy standards.
- My responsibilities span frontend architecture to API development and database management.

USMAN NASIR

FULL STACK DEVELOPER

usmannasir39@gmail.com

About Me

Organised and self-motivated software engineer graduate with 5+ years of experience in developing and deploying web applications and backend systems. Experienced in working with small and large teams across multiple projects and companies. Accustomed to Agile and Waterfall development model, and proficient in Python, PHP and Linux environments.

Experience

ShuftiPro **Feb 2024 - Aug 2024**

Senior Software Engineer

- Shufti Pro is a fraud prevention solution designed for customer due diligence and risk assessment. As a RegTech provider, it combines Artificial Intelligence and Human Intelligence to minimize friction, reduce costs, and prevent fraud and identity theft in online marketplaces.
- Effectively handled Client queries
- Implemented the bug fixations, and optimized the current implementations
- Technologies: Python, Laravel

ZUS **May 2023 - Jan 2024**

Frontend Engineer

- Züs is a true multi-cloud with no vendor lock-in. Choose the best providers, switch anytime. Züs is decentralized, open source, and high-performance with high-security features such as immutability, encryption, and proxy re-encryption. Züs is ideal for backups, AI, data lakes, and databases.
- The complex task is to communicate with the large team. To handle this conflict, I suggest to use the JIRA board.
- I worked as a Front end developer and managed the project as well,
- Technologies: Next, React, Tailwind CSS.

Rolustech **Mar 2019 - Apr 2023**

Senior Software Engineer

- Implemented API payload sharing system that resulted in better coordination among teams
- Managed MySQL Databases; automated the process of updating staging instances' databases with latest Production database after a set interval. This resulted in a streamlined QA process on the project
- Effectively led a small team, overseeing solution creation, task breakdowns, assignment, and ensuring timely sprint completion
- Collaborated with clients from the USA, Canada, UK, UAE, engaging in daily communication to ensure effective project coordination and client satisfaction

SPPC Jul 2022 - Dec 2022

FULL STACK DEVELOPER

- SPPC is basically a Saudi Pakistan Professional Community. It is similar to linked in handling user connections feature, notification features, chat features, posts features, handling user connections feature, notification features, chat features, posts features, events features, jobs features, company features and many more. It is a platform used for job searching and applying similar to linked in.
- I optimized the frontend for smooth user experiences and I craft an efficient job-search mechanism, enhancing user engagement through dynamic features.
- Technologies: React, Next, Redux, and Nest.

Kyochon Nov 2020 - Sep 2021

FULL STACK DEVELOPER

- Kyochon is basically an ecommerce platform, developed for customers.
- I worked on the multiple features of ecommerce such as handling products, deals, discounts, coupons, customers, reporting, marketing, and many other features.
- It contains a website for customers and admin panel for internal use.
- I handled the integration with 3rd Party Point of sale called foodics, which syncs products and orders with our system.
- Technologies I used React, Nest, MySQL, and TypeORM.

Tortilla Arabia Jan 2020 - Oct 2020

FULL STACK DEVELOPER

- Tortilla Arabia is an ecommerce platform, developed for customers. It includes multiple features of ecommerce such as handling products, deals, discounts, coupons, customers, reporting, marketing, loyalty and many other features. It contains a website and crm for customers and admin pannel for internal use.
- It also handles integration with 3rd Party System called GrubTech , which syncs products and orders with our system.
- Technologies used React, Node, MySQL, and TypeORM.

Education

PUCIT

BS in Software Engineering

Skills & Expertise

- Front End: Vue js, Tailwind CSS, HTML/CSS/Bootstrap
 - Back-end: Python, Fast API, Postgress, SQLite, MongoDB, Micro Services, Oauth, Redis, Nginx, SQL Alchemy, JavaScript, PHP, Kubernetes, Docker, Sugar CRM, Suite CRM, GIT
-

- Front End: React.js, Next.js, Redux, Redux toolkit, MUI, Tailwind CSS
- Back-end: Node.js, Express, Nest.js, Postgress, MySQL, MongoDB, Redis, Keycloak, AWS Cognito, AWS Lambda, Kubernetes, docker, WebSockets, Data Scrapping

Education

COMSATS

BS in Computer Science

Skills & Expertise

- Front End: React.js, Next.js, Redux, Redux toolkit, MUI, Tailwind CSS
- Back-end: Node.js, Express, Nest.js, Postgress, MySQL, MongoDB, Redis, Keycloak, AWS Cognito, AWS Lambda, Kubernetes, docker, WebSockets, Data Scrapping

-
- Front End: React.js, Next.js, Redux, Redux toolkit, MUI, Tailwind CSS
 - Back-end: Python, Node.js, Express, Nest.js, Postgress, Micro Services, MySQL, MongoDB, Redis, Oauth, Keycloak, AWS Cognito, AWS Lambda, Kubernetes, docker, WebSockets, Data Scrapping, Nginx

ABU BAKAR MUNIR

linktobakar@gmail.com

FULL STACK DEVELOPER

EDUCATION

2014 - 2017

PUCIT - PUNJAB UNIVERSITY
COLLEGE OF INFORMATION
TECHNOLOGY

- BS in Computer Science

SKILLS

- Front End: React, Next, Redux, React-Native
 - Back-end: Node, Express, Nest, Keycloak, AWS, AWS Cognito, Redis, MongoDB, Postgres, MySQL, GCP, Cordova, Ace framework
 - Programming: JavaScript, Typescript
- Using Apache Kafka as a communication mechanism between microservices is a popular approach for building scalable and event-driven architectures. Kafka provides a distributed publish-subscribe messaging system that allows microservices to communicate in a decoupled and asynchronous manner.
 - I have used the Kubernetes cluster in a cloud environment, AWS. The microservices have been containerized using Docker, with dedicated Docker images for each service. Kubernetes deployment resources, described in YAML files, detail image references, resource specifications, and the desired number of service replicas.

ZUS

DEC 2021 - JUL 2022

FRONTEND DEVELOPER

- Züs is a true multi-cloud with no vendor lock-in. Choose the best providers, switch anytime. Züs is decentralized, open source, and high-performance with high-security features such as immutability, encryption, and proxy re-encryption. Züs is ideal for backups, AI, data lakes, and databases.
- The complex task is to communicate with the large team. To handle this conflict, I suggest to use the JIRA board.
- I worked as a Front end developer and managed the project as well,
- Technologies: Next, React, Tailwind CSS.

XChange

FEB 2021 - NOV 2021

FULLSTACK DEVELOPER

- X-Change is an eCommerce mobile app where users can buy a variety of clothes for both men and women.
- My responsibilities encompassed both front-end and back-end development using React-Native and Node.js. On the front-end, I designed and implemented user-friendly interfaces, ensuring seamless navigation and a visually appealing shopping experience.
- On the back-end, I developed the server-side logic, managed databases, and optimized performance.

PROFILE

I have five years of experience in software development and user experience. I produce my best work when I am part of collaborative teams that encourage me to hustle, learn, and improve. I am a firm believer in information sharing and mentorship, and I do all in my power to assist others around me learn. Being a quick learner allows me to think on my feet, adapt, and solve whatever situation arises.

WORK EXPERIENCE

APEX DARAT - ERP

AUG 2022 - PRESENT

FULLSTACK ENGINEER (Majorly Backend)

- APEX DARAT ERP systems are designed to streamline and integrate core business processes, such as finance, human resources, supply chain, manufacturing, sales, and customer service. As a developer, you may need to create modules or extensions that interact with these processes.
- I break down the ERP system into smaller, independent modules or services. Each microservice focuses on a specific business function, such as finance, inventory, or human resources.
- Microservices are designed to be loosely coupled and independently deployable. Developers ensure that each microservice has its own database and business logic, reducing dependencies on other services.

Readii*FEB 2019 - JAN 2021***FULLSTACK DEVELOPER**

- Readii is an HR management system. It creates an engaging and automated onboarding process that ensures information retention, even from a distance.
- My role was pivotal in crafting a user-friendly and visually appealing interface, with a specific focus on the UI modal for uploading PDF documents.
- I was responsible for translating conceptual ideas into practical and aesthetically pleasing UI designs. This included creating wireframes and prototypes to visualize the UI modal for uploading PDFs. My designs were aimed at ensuring a seamless and intuitive user experience.
- The core functionality of the modal was the ability to upload PDF documents. I integrated this feature using appropriate libraries or custom code to allow users to easily select and upload PDF files. This involved handling file validation, progress indicators, and error handling to provide a smooth and error-free uploading experience.

Diamond Standard*AUG 2018 - JAN 2019***FULLSTACK DEVELOPER**

- I worked as a Full Stack Developer and enhance the user experience (UX) of innovative diamond commodities platform located in New York City.
- I handled both front-end and back-end development. On the front-end, I designed and created the user interface (UI), ensuring a visually appealing and user-friendly layout. I also implemented multiple sections to streamline navigation and improve UX, enhancing user engagement and satisfaction.
- Simultaneously, on the back-end, I developed robust and efficient systems to handle data processing, authentication, and other crucial functionalities.
- Technologies: React, Next, Webpack, Tailwind CSS, Node
