Full-stack MERN developer with 3 years of hands-on experience in building and deploying scalable, reliable, and user-friendly web applications. Adept at problem-solving and collaborating effectively within teams. Proficient in JavaScript, React, Node.js, MongoDB, and Express. Passionate about leveraging technology to solve real-world challenges and drive business success.

SKILLS

PROFESSIONAL

Backend & Cloud
- NODE , Express, Nest, Redis
- MongoDB, Postgres
- GCP, AWS,
- Micro Services, Keycloak

Front End
- React, Next
- Redux,
- Vue.js, VueX

Programming:
- Javascript, es6, es7
- Typescript

EDUCATION

SUPERIOR UNIVERSITY LAHORE

BS in Computer Science

Developed FYP on Tech Mart, an ecommerce Web application to manage the record of products in an organized way. Using MERN Stack Technology.

WORKING EXPERIENCE

FULL STACK DEVELOPER

LifeScript | Oct 2023 - Aug 2024

- LifeScript helps its users create well-versed and featured auto-biography using AI tools, input questionnaire, voice memos and images. The product has a 7-day free Trial and few subscription plans.
- I handled the backend side and developed features like User-written autobiography from Open AI (GPT), along with editor functionalities, including, speech-to-text and grammar suggestions
- The Challenging task was implementing the Image enhancements from AI if they required any images. To provide easiness, I proposed the solution for creating Multiple Chapters and their Questions, which the user will answer for autobiography, and after enhancements, that biography will be used as a book
- Technologies: React, Next, Material UI, Nest, GPT 3.5 Turbo - AI services, and AWS

FULL STACK DEVELOPER

NterNow | Apr 2023 - Oct 2023

- Nternow is a website for home buyers who want to tour homes in person without an agent or sales rep before deciding
- I worked as a Full Stack Developer and majorly handled the Front end side

WORKING EXPERIENCE

- Integrated responsive design to ensure an engaging user experience tailored to property seekers' preferences
- Integrated features like streamlined communication, data-driven decisions, and market-focused improvements
- Tech Stack: TypeScript, React, Redux, React-Bootstrap, Material UI, Rest API's, Nest, mySQL

FULL STACK DEVELOPER

Cluey | Nov 2022- Jun 2023

- Cluey targets an audience that selects brands based on their values and standards. Cluey keeps details about each brand, including what the brand is, how much and in what manner it participates in political campaigns, what impact it has on the public, and which alternative brands are available
- I implemented the client-side UI using styled-components that fetch Data through graphQL APIs in Next and Node was used to support the BE logic for a platform that caters to the audience driven by brand values
- I was involved in crafting robust APIs, data flow, and optimizing performance. I contributed to maintain data integrity and uphold privacy standards
- My responsibilities covered frontend architecture to API development and database management

BACKEND DEVELOPER

Your London Chauffer Services | Oct 2021 - Feb 2023

- YLC is a chauffer service and they provide reliable, luxurious transportation in London
- Worked on this project as a full-stack developer and developed a responsive web application using React and Bootstrap to provide luxurious transportation booking system
- I implemented a dynamic booking form with real-time chauffeur tracking functionality
- Created a database-driven backend using Nest.js, ensuring efficient data handling and storage
- Deployed the application to a production environment. Integrated webpack for module bundling and optimized build processes

FULL STACK DEVELOPER

Uptok | Apr 2021- Jul 2022

- Uptok provide Re-humanizing Digital Experiences. They Conduct 1-on-1 video shopping consultations with the most serious shoppers
- I handled both the front-end and back-end sides. It was challenging for me to integrate the Agora video and confirm approval from the Shopify app
- I created a dashboard for shopping with the sales studio and customer review
- I've integrated multiple APIs and Added payments methods using React, NodeJS, Typescript, and PostgreSQL
